DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Examiner is relying upon Applicant's arguments for the patentability of the instant claims, specifically Applicant's argument that Johnson et al. fail to teach or fairly suggest oxidized pigment particles specifically that the modified pigment particles taught by Johnson et al wherein the modified pigment particles comprise a surfactant or polymer chemically attached to the surface of the pigment particles prepared by reacting the pigment with a diazonium salt and that the oxidized pigment particles would not contain polymers or surfactants grafted to the surface was found persuasive and therefore the rejection of the claims has been withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
